

VICTOR ÅHGREN

CYBER SECURITY ANALYST

About

I am a passionate problem-solver with an unwavering enthusiasm for mathematics, programming, theoretical physics, and cybersecurity. My work ethic is impeccable, and I thrive under pressure, always opting for the most rational solutions. I pride myself on my continuous learning journey, and I'm always eager to collaborate with driven and passionate colleagues.

From a young age, I showcased my affinity for technology. Before entering high school, I had already honed my skills in Adobe Premiere, After Effects, and Cinema 4D, producing notable work at the age of 11. This early exposure was a boon, thanks to my father's association with Adobe. My college years further enriched my knowledge, introducing me to diverse technology sectors, data science, complex mathematics, and programming — the latter becoming a cornerstone of my expertise. . Blending this diverse skill set with my passion for cybersecurity defines the essence of my professional persona. Now I'm armed with more knowledge and working on my OSCP certification.

CORE SKILLS AND INTERESTS

- Vulnerability Assessment
- Penetration testing
- Cloud Providers (AWS, Oracle, Azure, IBM and GCP)
- Problem Solving while learning from your team
- SIEMs, Rapid7 InsightVM+ XDR, logs, app/cloudsec, IBM QRadar, CrowdStrike Falcon, Splunk, Dynatrace and Wazuh.
- Team Worker as well as individual responsibility
- Very fast learner
- Ethical Hacking
- Programming/coding

EDUCATION

Cyber Security Specialist | Stockholms Internationella Handelsskola 2020-2022

2 years | Finished |

Thesis about defensive machine learning in IT

Civ.Ing Medical technology | Royal Institute of Technology

Fell down the stairs and slipped a disc | Oct 2018 - April 2019

Third time, and now I started to feel like a sign. Plus it was only the programming, mathematics and theoretical physics that I really liked.

Civ.Ing Electromechanics | Royal Institute of Technology | Oct 2017 - April 2018

You can't make this up, but I caught whopping cough and was really, really sick for almost half a year.

Civ.Ing Microelectronics | Royal Institute of Technology Paused after a year | Oct 2009 - July 2010

For personal reasons I choose to take a break from school to continue it later, although at that point it had merged with electromechanics

Technical base year | Royal Institute of Technology (KTH)

Finished | Oct 2008 - July 2009

Some Loose courses between work & school

- General programming (C)
- Object-oriented programming (Java)
- Linear algebra and calculus
- General/Special relativity
- Modern physics (which is all quantum physics basically)

Employment

Consultant at TrustNet AB | Apr 2023 - Oct 2023

Cyber security consultant

Working on getting my OSCP certification

Come from an offensive background but I both have used and still can use almost all popular defensive software and methodologies.

Consultant at Samvima | Feb 2022 - Jun 2022

Cyber Security Consultant - Penetration tester

- Do an overall risk analysis of the clients cyber vulnerabilities
- Penetration test the clients LAN, Physical location, Domain and Cloud services etc.
- Present a report of all my findings and recommendations to fix any potential threats, code risks, XSS, CSRF, Social Engineering (with training incl.), Cloud breaches, Password findings etc.

Store Worker

ICA, ARNINGE | Dec 2017 - Jul 2018

Pack the shelves nicely, make sure it's clean, help customers and be really service-minded. Focus was always on team-work, hard work, fast work while simultaneously being calm and kind while helping customers!

Sandwich Artist to Restaurant Manager

Subway, Åkersberga | Oct 2010 - Jul 2014

Duties like before except I got more responsibilities. I still made sandwiches and of course served the customers - something we got praised for from a survey made. Manager duties incl. handling the money, doing inventory, placing orders, receiving said orders and handling a bunch of day to day issues that I became responsible for. I was also responsible for the controllers sent to check up on all stores, making sure everything was super clean, fresh and tidy. Which is always was.

Store Worker

ICA, Arninge | May 2009 - Oct 2009

A summer gig which later rehired me for a while, a place where I think, even though I was brought up to work hard for what I want, not look down on people and definitely not be scared to get your hands dirty and push it!

The work was simple, keep the store looking nice, work fast and efficiently and of course be polite and helpful to all customers and colleagues.

PERSONAL

- Problem solver
- Critical thinker
- Team worker
- Full of ideas
- Hard work ethic
