PROFILE

I am a Master of Science in Management with Business Analytics student seeking to enhance my professional development. I aim to synergize my analytical expertise with theoretical insights derived from business studies to evaluate organizational performance, particularly in the context of the international business environment. My proficiency extends various business disciplines, complemented by intermediate proficiency in utilizing R programming for analytical problem-solving. Demonstrating strengths in teamwork and time management, I am driven by an ambitious pursuit of further knowledge in software, data analysis, and visualization, which has become a crucial point of my professional interests.
