Education   •   University of Palestine– BSC. Software Engineering – 2021

Experience

We will

QA &Test Automation | January 2023 – October 2023

- Develop and execute automated test scripts using Selenium, Appium, Cypress, and JMeter with expertise in Python, JavaScript, and Java languages.
- Monitoring and updating the test case and scripts as we go in the project
- Apply QA methodologies, processes, and best practices to ensure the overall quality of software deliverables.
- Create API Automation Script using Rest Assured, postman, and Cypress with expertise in Python, JavaScript, and Java languages.
- Identify and report software defects and work with development teams to resolve issues,
- Work with cross-functional teams to develop and execute end-to-end testing strategies, including functional, performance, and security testing.
- Participate in design and requirements reviews to ensure testability and quality,
- Enhance the testing frameworks Continuously
- Monitor Automated tests scheduled runs (daily to evaluate GitHub Action Cl runs), fix failures (in scenarios), or debug failures (real issues) and report accordingly.
- Create performance Test Scripts using JMeter

Shift ICT

Software Quality Assurance| October 2021 – December 2022

- Conduct manual tests, interpret results, and debug issues.
- Create and execute test cases aligned with client requirements and report bugs.
- Verify and validate new tests, systems, and solutions.
- Work closely with business and development teams throughout the development life cycle.
- Use JIRA for defect tracking, follow the Defect Life Cycle (DLC), and identify root causes for reported bugs.
- Monitor and retest resolved bugs.
- Analyze user stories from the business team and assess impact analysis.
- Estimate testing effort and prepare User Acceptance Test (UAT) documents.
- Develop test scenarios, plans, and cases.
- Implement manual testing approaches and improve software, especially during the design phase.
- Add tasks, epics, and bugs to JIRA.
- Implement various testing types (e.g., smoke, regression, integration, acceptance).
- Provide weekly performance reports to senior managers.
- Maintain quality documentation.
- Ensure timely and comprehensive execution of all QA tests.

Freelancer

Flutter developer| January 2020 – September 2021

- Design and develop mobile applications using Dart language with API calls.
- Experience in developing Android/iOS applications and deploying them on
- Google Play/App Store.
- worked on third-party libraries and APIs.
- Integrate with SQLite and Firebase and handle network permissions.

Skills&
Knowledge
domains

• JIRA	• SDLC	• SQL	• ERP
• Security testing	• Agile Methodologies.	• UML diagrams	• UI testing
• Software improvements	• Customer services	• GitHub Actions	• Process Modeling
• Java- Python-JavaScript-Dart	• Design mockups and prototypes	• Documentation	• Rest Assured |
• GitHub	• Stakeholder Management	• TestRail	• JMeter
• Cypress	• Scrum	• Process Mining	• Selenium WebDriver
• STLC	• Jira	• Git	• Technical writer
• Organized and efficient	• Test case	• Test plan	• Product /Project Management
• Appium	• Postman	• Time Management	• Communication skills
• Strong analytical and problem-solving skills.	• Able to work efficiently within teamwork
